Marlborough, MA, August 27, 2007 – The Center for Educational Leadership and Technology (CEL T) was selected by the Los Angeles County Office of Education and the Stockton Unified School District to assist in the needs assessment and procurement of a contemporary Student Information System. These projects will assist both educational agencies in reaching their vision for a web-based, interoperable, and fully integrated Student Information System. CEL T's extensive experience in this area will help these agencies meet the informational needs of their administrative and instructional staff so that they can better serve the students and parents within their communities.

The goal of the new Student Information System will be to improve student performance by providing students, parents, teachers, and administrators with immediate access to student information. This real-time information will be used to both inform and guide instruction. It will also be used to improve decision making and ensure internal business processes are more efficient and effective. The accountability and reporting requirements of the No Child Left Behind Act have placed additional requirements upon schools to make efficient use of technology. One of the ways of addressing this is to implement new administrative systems to accelerate organizational change focused on improving student achievement. Some of CEL T's most recent Student Information System procurement projects include statewide assistance for the Hawaii Department of Education and several large school districts.

CEL T is an internationally recognized educational reform and information technology services firm that provides technical assistance services to public and private school districts, state departments of education, ministries of education, and other government organizations.

"Our previous work assisting education agencies with the procurements of mission-critical Student Information Systems, Finance/HR systems, and other administrative solutions provides a solid foundation for these projects. We are pleased to have been selected by these exemplary educational organizations to help research, plan, procure, and manage this complex large-scale project. We look forward to working with national and international educational leaders to advance student achievement and assist educational organizations in procuring and implementing world class administrative systems", said Dr. John Phillip, Chief Executive Officer for CEL T.

About CELT

Working with the vision, mission, and goals of educational organizations, CELT, a leading research, planning, and systems integration provider, assists with the implementation of technology in support of contemporary educational reform initiatives.

Through the implementation management of technology-based programs and services, CELT works collaboratively with educational organizations to not only support but also transform 21st century teaching, learning, and management. CELT helps public and private learning organizations at all levels with the identification, procurement, implementation, training, and integration of information products and services. This is accomplished by working cooperatively with the organization's staff and community in conjunction with regional, national, and international information technology vendors.

CELT is one of the most comprehensive providers of research/planning programs, systems integration services, and customized decision support solutions. CELT's goal is to provide services of the highest quality, with a focus on student achievement, in the most timely, efficient and cost-effective ways possible using the latest information technology architecture.
